Projects :
1.
Project Name :Online Watch Shopping
Platform :.Net
Description :

Our project is online Watch Shopping. Which helps people to find and buy latest Watches with help of internet. In this application we have basically 2 modules 1st module includes customer module and 2nd module is admin. The admin contains the access of admin on the application

2.
 Project Name :Event management System
 Platform :.Net
 Description:
 This is an Online event management system software project that serves the functionality of an event manager. The system allows only registered users to login and new users are allowed to resister on the application. This is a web application developed in Asp.net and Sql . The project provides most of the basic functionality required for an event. It allows the user to select from a list of event types. Once the user enters an event type eg(Marriage, Dance Show etc), the system then allows the user to select the date and time of event, place and the event equipment's. All this data is logged in the database.

3.
 Project Name :Online Electronic Shopping
 Platform :.Net
 Description:
 This project is made in ASP.Net using C#.Net with Sql Server based on topic on Online Electronics Shopping. This project covers all the aspects of online shopping. There is also a admin panel through which we can manage the whole site like adding, updating, deleting new categories, sub categories, products. Viewing orders placed by users on the site. And much more......
